### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to because the “hub 226” mentioned on page 10, Para. [0031], line 2, is not numbered in the drawings. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

2. The disclosure is objected to because of the following informalities: page 7, Para. [0025], line 2, “14” should be changed to --24--; and page 11, Para. [0033], line 2, --of motor—should be added after “hub”.

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-5, 7, 9-10, 12-13, 16-21, 23-27, 29, 31-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Nawa. Nawa discloses a cylindrical reel driver having gear teeth engaged with the supply reel, axially extending spline elements 121a accommodated in grooves 112a of a drive hub 110 and a stop element 124a disposed at a distance from the upper end of drive element 120 that is greater than the distance of the spline elements from the upper end of drive element 120 (note that the stop element 124a is formed on flange 124 at the lower end of cylindrical portion 121), and motor 60 for rotating the reel driver.

Re claim 2 the “reel plate” as claimed is the member 110 of Nawa.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 6, 8, 11, 14, 15, 22, 28 and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nawa. With respect to claims 6 and 15 the particular distance between the splines and the outer diameter of the motor portion 62 in Nawa would have been an obvious design consideration to one of ordinary skill in the art since the distance is not seen to be critical

to operation of the device. Re claims 8, 22 and 28 whether the upper portion of protrusions or stop elements 124a of Nawa are “planar” as claimed would have been obvious to one of ordinary skill in the art since it appears to be immaterial whether those portions are planar or any other shape as long as they are able to function as stops. Regarding claims 11, 14 and 30 likewise, whether the surface of member 110 of Nawa that engages the stop element 124a is “planar” would have been obvious to one of ordinary skill in the art for the same reasons as set forth above, i.e. the shape is unimportant—it would function as a stop no matter the shape.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John M. Jillions whose telephone number is (703) 308-2685. The examiner can normally be reached on M-F 9:15 - 5:45.
